# NOTES TO THE FINANCIAL STATEMENTS
# FOR THE YEAR ENDED 30 JUNE 2008

## 1. Significant accounting policies

The Melbourne Community Foundation Extension Fund (the "Fund") is a Fund domiciled in Australia. The Trustee of the Fund is Community Foundation Network Ltd (the "Trustee"). The address of the Fund's and the Trustee's registered office is Suite 6, 19 - 35 Gertrude Street, Fitzroy, Victoria 3065.

The financial report was authorised for issue by the Directors on 18 November 2008.

The significant polices which have been adopted in the preparation of this Financial Report are:

### (a) Statement of compliance

The financial report is a general purpose financial report which has been prepared in accordance with Australian Accounting Standards ("AASBs") (including the Australian Accounting Interpretations) adopted by the Australian Accounting Standards Board ("AASB"). The financial report of the Fund also complies with the IFRSs and interpretations adopted by the International Accounting Standards Board.

### (b) Basis of measurement

The financial report is presented in Australian dollars.

The financial report has been prepared on the historical cost basis except for certain financial instruments which are stated at their fair value.

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

The accounting policies set out below have been consistently applied to all periods presented in these financial statements.

### (c) Foreign currency transactions

Transactions in foreign currencies are translated at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to Australian Dollars at the foreign currency closing exchange rate ruling at the balance sheet date.

Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the income statement. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to Australian dollars at the foreign currency closing exchange rates ruling at the dates that the values were determined. Foreign currency exchange differences relating to investments at fair value through the income statement are included in gains and losses on investments. All other foreign exchange differences relating to monetary items, including cash and cash equivalents are presented separately in the income statement.

## NOTES TO THE FINANCIAL STATEMENTS
## FOR THE YEAR ENDED 30 JUNE 2008

**(d) Revenue recognition**

*(i) Interest income*

Interest income and expense is recognised in the income statement as it accrues, using the effective interest rate method of the instrument calculated at the acquisition or origination date. Interest income includes the amortisation of any discount or premium, transaction costs or other differences between the initial carrying amount of an interest-bearing instrument and its amount at maturity calculated on an effective interest rate basis.

*(ii) Dividend and distribution income*

Dividend and distribution income relating to exchange-traded equity investments is recognised in the income statement on the ex-dividend date.

In some cases, the Fund may receive or choose to receive dividends / distributions in the form of additional shares / units rather than cash. In such cases the Fund recognises the dividend / distribution income for the amount of the cash dividend / distribution alternative with the corresponding debit treated as an additional investment.

*(iii) Franking credits*

Imputation tax credits in respect of dividends and distributions received are recognised as revenue as at the date the share is quoted ex-dividend. As the application for the refund of excess imputation credits can only be made after year end, the applicable revenue is accrued for at year end.

*(iv) Donations*

Donations are recognised when received.

**(e) Expenses**

All expenses are recognised in the income statement on an accruals basis.

**(f) Cash and cash equivalents**

Cash and cash equivalents comprise cash balances, short term bills and call deposits.

**(g) Receivables**

Receivables may include amounts for dividends, trust distributions, imputation credits and interest. Dividends, distributions and imputation credits are accrued when the right to receive payment is established. Interest is accrued at the reporting date from the time of last payment. With the exception of imputation credits, amounts are generally received within 30 days of being recorded as receivables. Refer Note 1 (d) (iii) regarding imputation credits.

**(h) Investments**

Investments are classified as at fair value through profit or loss if it is held for trading or is designated as such upon initial recognition. Investments are designated at fair value through profit or loss if the Fund manages such investments and makes purchase and sale decisions based on their fair value with the Fund's documented risk management or investment strategy. At each reporting date, investments are re-valued at their quoted bid price and fair value movements are recognised through the profit or loss. The value of the Fund's investments have been impacted by the decline in value of shares on the Australian Stock Exchange resulting from the global economic downturn.

**(i) Buy backs**

The total proceeds including imputation credits of the investment less the fair market value the day before the buyback is used to calculate the portion attributable to income. The basis of this policy is to retain the capital value of investment and unitholder funds.

## NOTES TO THE FINANCIAL STATEMENTS
## FOR THE YEAR ENDED 30 JUNE 2008

**(j) Plant and equipment**

Items of plant and equipment are measured at cost less accumulated depreciation. Depreciation is charged using the diminishing value method over the estimated useful lives of each part of an item of plant and equipment.

**(k) Payables**

Payables include liabilities and accrued expenses owing by the Fund which are unpaid at balance date.

**(l) Income tax**

The Fund is exempt from income tax under Section 50-5 of the Income Tax Assessment Act 1997. The Fund is a deductible gift recipient.

**(m) Goods and services tax**

Expenses are recognised net of the amount of goods and services tax (GST) recoverable from the Australian Taxation Office (ATO). GST on brokerage is claimed at the rate of 75% of the total. Payables are stated with the amount of GST included. The net amount of GST recoverable from the ATO is included in receivables in the balance sheet. Cash flows are included in the statement of cash flows on a gross basis.

**(n) New standards and interpretations not yet adopted**

Certain new accounting standards and interpretations have been published that are not mandatory for 30 June 2008 reporting periods. They are available for early adoption at 30 June 2008, but have not been applied in preparing these financial statements. The Directors' assessment of the impact of these new standards (to the extent relevant for the Fund) and interpretations is set out below:

AASB 8 Operating Segments introduces the "management approach" to segment reporting. AASB 8, which becomes mandatory for the Fund's 30 June 2010 financial statements, will require the disclosure of segment information based on the internal reports regularly reviewed by the Fund's Chief Operating Decision Maker in order to assess each segment's performance and to allocate resources to them. Under the management approach, the Fund will present segment information on charitable organisations in Australia.

Revised AASB 101 Presentation of Financial Statements introduced as a financial statement (formerly "primary" statement) the "statement of comprehensive income". The revised standard does not change the recognition, measurement or disclosure of transactions and events that are required by other AASBs. The revised AASB 101 will become mandatory for the Fund's 30 June 2010 financial statements. The Fund has not yet determined the potential effect of the revised standard on the Fund's disclosure.

**(o) Distributions**

Distributions paid are grants made by the Fund, to approved organisations and individuals for general charitable purposes and are recorded on a cash basis.

## (p) Financial risk management

**Overview**

The Fund has exposure to the following risks from their use of financial instruments:

- credit risk
- liquidity
- market

This note presents information about the Fund's exposure to each of the above risks, its objectives, policies and processes for measuring and managing risk, and the management of capital. Further quantitative disclosures are included throughout this financial report. The Board has overall responsibility for the establishment and oversight of the risk management framework and for developing and monitoring risk management policies.

Risk management policies are established to identify and analyse the risks faced by the Fund, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities.

The Finance & Investment Committee oversees how the Fund's manager monitors compliance with the Fund's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund.

**Credit risk**

Credit risk is the risk of financial loss to the Fund if a counter party to a financial instrument fails to meet its contractual obligations, and rises principally from the Fund's investment securities and receivables from investment securities. Other credit risk arises from cash and cash equivalents holdings of the Fund.

The Fund's exposure to credit risk is influenced mainly by the individual characteristics of each investment security. Approximately 99 percent (2007: 99 percent) of the Fund's investment revenue is attributable to transactions with ASX 200 companies.

The Fund's manager has established a credit policy based on the present investment mandate set by the Finance & Investment Committee that complies with the the Fund's risk tolerance level and investment objectives.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date is disclosed in Note 7.

**Liquidity risk**

Liquidity risk is the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due and by maintaining sufficient cash and cash equivalents to meet normal operating requirements.

**Market risk**

Market risk is the risk that changes in market prices, such as movements in interest rates and equity prices will affect the Fund's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising returns.

a) Interest rate risk

Interest rate risk refers to the risk that the fair value of financial instruments or future cash flows will fluctuate due to changes in market interest rates.

## NOTES TO THE FINANCIAL STATEMENTS
## FOR THE YEAR ENDED 30 JUNE 2008

b) Other market price risk

Equity price risk arises from fluctuations in the fair value of investment securities. The minimum and maximum asset mix of cash, equity, fixed interest, listed and unlisted trusts are set by the Investment & Finance Committee based on market conditions. Material investments within the portfolio are managed on an individual basis by the Fund's manager and all buy and sell decisions are at the discretion of the Fund manager.

The primary goal of the Fund's investment strategy is to maximise investment returns with the assumption that a high proportion of funds will be retained in perpetuity. The investment objective is to achieve a total return on investment funds of at least three percentage points greater than the growth in the Consumer Price Index over a rolling three-year period. In accordance with this strategy investments are designated at fair value through profit or loss because their performance is actively monitored and they are managed on a fair value basis.

**Capital Management**

The Board's policy is to maintain a strong capital base so as to maintain the sub-fund's capital contribution and to sustain future development. The Board monitors the return on capital on three, six, nine and twelve month rolling periods based on movements in investment security unit prices.

There were no changes in the Fund's approach to capital management during the year.

## NOTES TO THE FINANCIAL STATEMENTS
## FOR THE YEAR ENDED 30 JUNE 2008

**(f) Market price risk**

Market price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices whether caused by factors specific to an individual security or all factors affecting all securities traded in the market.

As the majority of financial instruments are carried at fair value with fair values changes recognised in the income statement, all changes in market conditions will directly affect Net investment income.

Under normal circumstances the Fund will invest in the following instruments:

Asset Class
Property (Direct/Listed and Unlisted)
Australian equities
International and Alternative Investments
Fixed interest
Cash

Sensitivity analysis

More than 90% of the Fund's equity instruments are listed on the Australian Stock Exchange. A 3 percent increase in the Australian Stock Exchange at the reporting date would have increased net assets attributable to unitholders and the profit from operating activities by $18,481 (2007: an increase of $18,481); an equal change in the opposite direction would have decreased the net assets attributable to unitholders by an equal but opposite amount.
